Indian Society of Personalized Medicine is the first registered society in India which has been established under the leadership of Prof. (Dr.) Farzana Mahdi, together with various National and International advisors. The main objective of the society is to disseminate knowledge and promote academic excellence in the field of Personalized Medicine. The society was formed with the vision to bring scientists, academicians and clinicians on one platform so that their expertise can be utilized for specialized patient care and eventually to streamline the public health at large.

The Department of Personalized and Molecular Medicine proposes to organize 3rd International Conference on Personalized Medicine and 2 days pre-conference Hands on workshop on Sanger Sequencing. Experts will cover disease based gene profiling encompassing transcriptional and translational analysis culminating to personalized treatment and management. We encourage and invite scientific and clinical fraternity to join hands with our effort to gain better understanding and knowledge in cutting edge technology and treatment.
